Seattle City Employees' Retirement System
Board of Administration

Domestic Fixed Income

The Seattle City Employees' Retirement System has a 29% allocation to domestic fixed income. At the end of 2001 our Fund had assets of almost \$1.4B. We have approximately \$400M managed by several fixed income managers, utilizing both core and core plus strategies.

Our next search for domestic fixed income managers will be conducted during the first quarter of 2006. This website link will then include a Request for Proposal (RFP). The RFP should be available in late December of 2005 or early January of 2006, with a due date for proposals usually three to four weeks after the RFP is first available.

The official announcement of our search will be posted in the Seattle Daily Journal of Commerce. Sometimes the news of our searches will appear in publications such as: Investment Management Weekly and Pensions & Investments.
